Ok, just talked to the VADEQ inspector, he's fine with me writing the letter and including that VADEQ agrees and approves, or something to that affect. So I will write that and get it into concurrence this week.

Ok, good.
Thanks again for my copy (right . . .)

Honeywell sent it to both of us and in the statement of work cover letter Honeywell even says that they are submitting it for EPA approval. Its VADEQ who seems to be taking us out of the approval chain. I received it in my mailbox yesterday.

I will call VADEQ today and restate the, we (EPA) approve, "in consultation with VADEQ" phrase part.

Thanks
Kris

Kris,

I think what you've proposed is fine. I would, however, carefully phrase in your letter that we (EPA) approve, "in consultation with VADEQ". I wouldn't phrase it that we need to "approve the plan together".

Just wondering: did Honeywell only send the Statement of Work to VADEQ? Because the CD states that they "shall submit [it] to EPA".

Dennis,

We got a CD submittal from Honeywell for the Benzene Audit Statement of Work plan. I have your copy which I will drop off tomorrow. Paragraph 23 of the CD says we (EPA) approve it, in consultation with VADEQ. Below is a message I got from the inspector from VADEQ. I was planning to call him tomorrow to discuss it, but instead I replied and said we needed to approve the plan together and I would draft up a letter.

Kris

I have received the Benzene Waste NESHAP Audit, Statement of Work. I have reviewed the document. I have no concerns about the submission. The information contained in the document is what is required in conditions 23 through 27 of the CD. I plan to approve the submission.
